Cory checked the Tier 2 reporting site and there are no listed above ground storage tanks at EHS Sites in the City of Muncie.

We do not know of any other lists available for above ground storage tanks that hold anything else. Gasoline, Diesel, and Kerosene do not fall into the EHS category.

If you end up finding a list somewhere that has address or coordinate location information I can definitely map them for you.

Anything over 100 gallons. Would it be possible to map the tier 2 chemicals that are stored in 100+ gallon ASTs?

Gretchen,

I talked with Cory and John in EMA, there is no local list of above-ground storage tanks. The only thing that EMA is required to track is industries or businesses that have to report Tier 2 chemicals (Extremely Hazardous Substances – EHS).

Do you have more of a description of what type of above-ground tanks you have to identify for your environmental review forms?

Hi Kyle,

I've been talking to the fire department about the location of Above Ground Storage Tanks (ASTs)

Burford says Emergency Management has a list. They have been talking to Cory Kissick about it. Any chance those locations could be mapped? Or if you already have such a map?

It's a question on our environmental review forms.

Thanks!!
